

We are a successful Swiss family-owned company in Dübendorf that distributes pharmaceuticals, medical devices and food supplements in Switzerland. Our flexible structure, our strong understanding of quality and our high level of expertise in all areas make us an ideal partner for physicians, pharmacies, drugstores, and hospitals.

For our rapidly growing department, we are looking for a committed, resilient, and innovative personality as:

BI Data Engineer f/m/d 100% (temporary for one year)

Responsibilities:

You will play an important role in the development and enhancement of the data warehouse and analytics platform by

- compiling structured and unstructured data from internal and external sources and making it available in meaningful data marts.
- You are responsible for the conceptual groundwork and the end-to-end implementation. This ranges from the integration of different data sources to the deployment in the corresponding evaluation layers.

Your profile:

For this exciting challenge, you have a higher degree in computer science or business informatics. You already have professional experience in Business Intelligence and have strong knowledge in databases and data management. You are experienced in SQL and have no problem mastering common programming languages, ideally also LUA scripting. Teamwork is important to you and analytical thinking comes easily to you. If you find yourself in these requirements and have a can-do mentality, then don't hesitate to reach out to us.

We offer:

A responsible, varied job with a high degree of personal responsibility and creative freedom. You will be supported by a highly motivated team and an open corporate culture with short decision-making processes. Above-average social benefits and attractive employment conditions, such as 5 weeks' holiday, hybrid working with flexible working hours and free parking round off the offer. Become part of our agile team and send us your application by email to: jobs@biomed.ch. We are looking forward to meeting you!
